

Yanfeng. Zhang, Phd, holds a professor position at School of Chemistry and Chemical Engineering, Shanghai University of Engineering Science. He obtained his bachelor of chemical engineering at East China University of Science and Technology in 1996 and Phd of chemistry at University of Texas at Dallas in 2007. From 2007~2011, he served as research associate at University of Colorado at Boulder. From 2011 to 2017, he was employed by Shanghai Advanced Research Institute (Chinese Academy of Sciences) as a professor title. He has been working in Shanghai University of Engineering Science since 2017. His research interests include synthesis and characterization of various porous materials and their applications in adsorption, membrane separation and catalysis. He has ~50 peer-reviewed publications and ~20 patent applications (9 granted).

Address: School of Chemistry and Chemical Engineering, Shanghai University of Engineering Science, 333 Longteng Rd, Songjiang District, Shanghai 201620, China
